What if ?

An accessible NFT game, generous and simple, at the crossroads of fantasy and video gaming.

A game grounded in reality, allowing everyone to experience unique online or real-life experiences.

A game built with the community, sustainable, supported by PMU, and within a safe framework.

A game that extends into immersive spaces, allowing us to decidedly reinvent ourselves.

Still unanswered questions to which we want to respond with the players (connection with reality, race organizers, etc...).

A large, 3D-style 'S' logo in a vibrant yellow-green color, set against a dark blue space background with green laser beams and a nebula. The 'S' is semi-transparent, revealing a planet-like texture underneath.
